

SHADAB SHAIKH (M)

EMBEDDED SYSTEMS ENGINEER

EXPERIENCE

WORKING STUDENT – AUTOMATION SOFTWARE DEVELOPER

TESTIA GmbH, Bremen Germany

01/2024 – Current

- Development of Automation Tasks in Python for Synchronisation of user information across various company databases
- Managing mobile devices directory using GLPI
- Assisting in various other smaller day to day tasks

SENIOR ENGINEER - EMBEDDED SYSTEMS

NHANZ SYSTEMS PVT. LTD., Bangalore, India

07/2020 – 03/2023

- Development of Full Software Architecture of a Motor Controller for EVs
- Research on optimizing the efficiency of the Motor Control Algorithms
- Module Testing using Ceedling Unit Test for Test Driven Development
- Defining the HSI (Hardware Software Interface) for the Motor Controller Platform
- Performance Testing of the Inverter Hardware
- Bootloader Port and Flash Programming

EMBEDDED SYSTEMS DEVELOPER (TCU APPLICATION)

INMOTIVE INC., Bangalore, India

07/2020 – 07/2022

- Firmware development for TMS570 Microcontroller Platform
- Transmission Control software reprogramming
- Curtis Motor Controller reprogramming
- System Testing on Dynamometer

FIRMWARE DEVELOPMENT CONSULTANT

BIODESIGN INNOVATION LABS, Bangalore, India

05/2020 – 07/2020

- State-machine development for HMI frontend and backend programming
- Defining the HSI for a Ventilator Controller Architecture
- Servo Motor Control Programming and UART Communication interfacing.
- Product Validation testing

ABOUT ME

Motivated Student currently pursuing a master's degree in Embedded Systems Design. Valuable working experience in the research and development of software architecture, design and testing of products. Comprehensive knowledge in the field of Embedded Systems and Computer Programming.

Date of Birth: 20.05.1996

Nationality: Indian

Family Status: Single

EXPERTISE

Languages

English: Professional Proficiency

German: Good

Software-Expertise

C/C++: Excellent

MATLAB/SIMULINK: Very Good

Python: Good

Other-Skills

Motor Control Algorithms

Electric Vehicle Architecture

Image Processing

Real Time Operating Systems

Model Based Design

HIL/SIL Testing

ARM Microcontrollers

EXPERIENCE

EMBEDDED SYSTEMS ENGINEER

EMFLUX MOTORS PVT. LTD., Bangalore, India

07/2018 – 04/2020

- Direct Software Development for the EMFLUX ONE Electric Motorbike
- Simulink based Model Design of the Motor Controller Algorithm
- Induction Motor Control Algorithm Development
- Data Acquisition Software in Embedded Linux & Hardware Development
- CAN Communication Architecture Design for Prototype ECU/Master Controller

EDUCATION

Masters in Embedded Systems Design

Hochschule Bremerhaven, (Bremerhaven, Bremen)

04/2023 – today

Topics of focus: Digital Systems, Discrete Control Systems, VHDL, Model Based Design

Semester Project: Autonomous Car

- Requirements and Specification analysis
- The trajectory of an autonomous car was modelled in MATLAB
- Implemented on HARDWARE using Lego Mindstorm Platform

Bachelors in Electronics and Communication

Savitribai Phule Pune University, (Pune)

09/2014 – 07/2018

Topics of focus: Analog Circuits, Communication, Digital Systems, Control Systems, Image Processing

Project: e-Health Monitoring using rPPG:

- Contactless Heart rate detection using video of Human Face
- Algorithm Design in MATLAB
- Digital Signal Processing
- Image Processing

EXPERTISE

Other-Skills

Bootloader

CAN Communication
